Profit. No loss.

Want to enrich your trading experience without taking risks?

J-Simulator is the answer.

Patsystems electronic training tool allows you to develop your trading skills with real products in real markets. But, because your trades are not executed, you learn without losing.

J-Simulator provides:

- All the functionality of J-Trader
- The ability to keep positions overnight, see real-time profit and loss on open positions, and paper trade against real market price movements
- Live (or delayed) prices
- Automatic order-matching via the Patsystems Matching Engine

There's no substitute for experience. And when it comes to trading, J-Simulator will give you the edge you need. To find out more, contact us at info@patsystems.com.
