Mobile Financial Services

Mobile payments made simple and secure

[LEARN MORE](#)

Digital Banking Platform

NETInfo Digital Banking Platform is a comprehensive omnichannel solution that unifies multiple channels and creates a single, seamless banking service for retail, corporate and high-net-worth individuals. At the same time, the platform greatly enhances customer experience through in-built analytics and personalisation tools.

Why NETInfo

Our growth parallels the rise of digital and mobile communications. With nearly two decades of experience, we are digital natives with a comprehensive understanding of how banks and financial institutions can best meet their customers' needs and position themselves for the future.

NETInfo's customised solutions maximise speed and efficiency and improve customer journeys and engagement. Ease of administration, including extensive self-administration and maintenance capabilities, is fundamental to the NETInfo offering, as are competitive pricing and rapid implementation.

The result is a market-leading omnichannel and mobile banking service that gives banks and financial institutions the power to serve their customers in the way they expect today. That means online, on the move, on demand.

What we offer

Barclays Private Bank is committed to your success. Wherever you are, we bring together the right people, ideas and opportunities to achieve your ambitions. With the global strengths and skills of Barclays behind us, we provide a worldwide service from our regional centres in Europe, India, the Middle East and North Africa. It's a highly focused and collaborative approach that draws on a wide range of advisors and specialist services. At the heart of this relationship is a dedicated Private Banker, who will work closely and creatively with you to protect and build your wealth.

Digital Banking

Online access to your accounts with powerful investment and payment capabilities.

We are continually improving our digital services to give you swift, secure, real-time banking. Our online and mobile platform will simplify the day-to-day management of your finances and provide instant visibility of your wealth portfolio.

Philanthropy Service

Philanthropy means different things to different people, reflecting the diverse ambitions and backgrounds of our clients and their families. We help you find the right approach and focus.

Whatever your philanthropic aims, we can help you understand the key issues and guide you with a strategy that meets your needs. This includes:

- Information on practical, flexible and effective giving including guidance on the best structure options
- Help to identify your own philanthropy profile, including cause areas, extent and profile of involvement
- How to measure success and ensure your giving is meaningful to you and your family
- How to engage family members, including children, to create an inter-generational legacy which can promote social responsibility
- Bespoke literature and exclusive events to help you widen your understanding of philanthropy.

Working Capital

Debtor protection

Do you have money tied up in invoices or other assets? Our solutions can release cash to help you run and grow your business. We have experience across all sectors and industries, and our experts will guide you on the best options for your business and goals.

Invoice Finance

You can release up to 90% of the value of unpaid invoices through our Invoice Factoring and confidential Invoice Discounting services. It means that your business will receive an immediate cash injection, often within just 24 hours, and you avoid cash flow problems because you no longer have to wait months for debtors to pay you.

Invoice Factoring is for businesses with an annual turnover of more than £50,000. You can effectively outsource your sales ledger, monthly statements and payment reconciliation to us, freeing up your time to concentrate on your business. Because we take care of collection, you don't have to chase customers for late payments.

Invoice Discounting is a confidential service for businesses with an annual turnover of more than £250,000. With Invoice Discounting, you continue to manage your sales ledger, invoice raising, monthly statements, payment reconciliations and credit control processes. It is easy to implement and no major changes are required to your existing finance systems.

Debtor Protection

An additional feature of invoice finance, Debtor Protection provides low-cost, easy-to-manage protection if a customer fails to pay. Your business will be protected for up to 90% of a bad debt, excluding VAT. Debtor Protection will give you greater confidence to trade in the UK and overseas, and it's a good option if you sell to other businesses on unsecured credit terms and expect your annual turnover to be £200,000 or more.

Asset Based Lending

Your assets can be used as security to raise funds. You can increase your working capital by unlocking the value from a wide range of assets, such as stock, plant and machinery, property, and debtors. Asset Based Lending is available to businesses with an annual turnover of £10m plus and works alongside an Invoice Discounting facility to provide funding secured against your assets. This form of lending is popular with businesses seeking growth, and is an alternative to more traditional funding.

Restructuring, mergers and acquisitions, and management buyouts are examples of how asset-based lending can be used. Key benefits include equity protection, as funds are raised without sacrificing equity, and scalability and flexibility. Finance can grow in line with your business, and you can manage cash flow fluctuations by raising funds from assets not usually permitted as security for traditional loans.

Asset Finance

Perhaps you want to invest in new machinery to drive growth, or you need better automated systems to increase productivity. Asset Finance will allow you to make a wide variety of purchases without impacting your working capital. We have two funding options: hire purchase and finance lease.

Hire purchase is for those who want full ownership of the asset at the end of the finance period but don't want to make a large one-off payment. Finance lease enables you to rent and use an asset without having to buy it. We will purchase the asset and lease it to you for regular rental payments over an agreed term. Typically, rental payments cover the majority of the cost of the asset plus interest. When the asset is sold, you receive most of the proceeds.

Asset Finance is only for UK-based businesses with an annual turnover of more than £50,000.

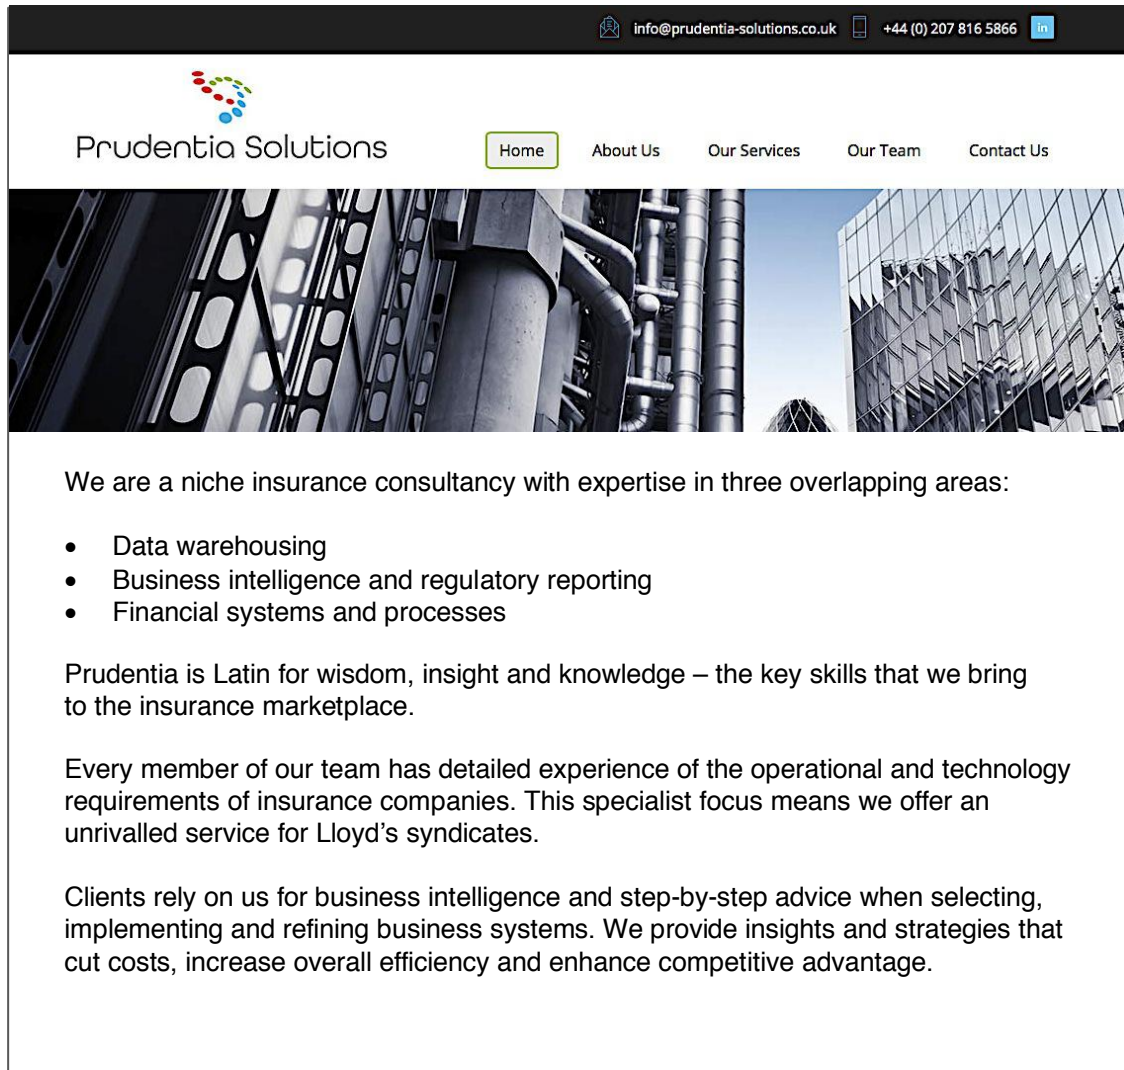

To discuss how we can support your business by making more of its working capital, please speak to your relationship manager or email us
